Dear Douglas,

Thank you for sharing information on the project to create new paths, viewpoints and conserve Upper Cormonachan. Having visited the site I was impressed by the plans and the woodland area's potential to create a really meaningful and attractive place to visit. Taking advantage of the natural features and also the history and heritage of the site.

I'm supportive of the proposed development and what you are trying to achieve and believe it fits well with the objectives set out in our Economic Strategy, in particular, helping the area work towards a world class tourism destination. I believe the project has potential to attract and draw new visitors to the Lochgoilhead area and be an asset for the future.

We are very keen to see developments such as yours which have potential to provide a range of benefits and support rural communities and local business.

Yours sincerely,

A handwritten signature in black ink that reads 'Craig Wilson'.
